Cyber Security Training and e-learning Corporate development services

Our courses are fully and personally tailored to the needs of the organisation, its business objectives and its specific requirements.

Our trainers train the front line of Israeli Cyber Defence against the most ferocious cyber attacks experienced anywhere in the world.

We offer a wide range of instructional and learning solutions that combine e-classroom instruction (Instructor Led Training), using advanced and innovative learning technologies based on combining the concept of e-Learning with traditional learning techniques.

Our Courses Include

Introduction to Cyber Warfare

Web Application Hacking

Hacking and Securing MS Environments Using PowerShell

Hacking with python

Malware Analysis Workshop

Network Security Monitoring

Check Point Cyber Security Engineering (CCSE) R80.10

Individual and Group Assessments

Our Trainers are experienced, capable individuals. They have trained groups from a wide range of businesses in SME and Enterprise level.

Our Trainers have an understanding of organisations and how they function. Their assessments provide a business with a realistic view of their cyber security safety level keeping in-line with an evolving benchmark.
